eDOC Announces the Next Generation of Branch Check Image Capture

MIDWAY, UT and GRAND RAPIDS, MI – January 6, 2009

eDOC Innovations (EDI), the nation's leading CUSO for e-document strategies, announces its next generation of strategic solutions for Check21 image management: CheckLogic for branch check image capture. CheckLogic is an automated Check21 solution for branch check image capturing and electronic forwarding. Because CheckLogic technology can be adapted to work with any check clearing house, it can aid any credit union in Check21 image processing and complement or complete any electronic document management strategy.

"I am very pleased to be able to provide our peers and owners a comprehensive e-Document Strategy that includes their check image capture and forwarding. So many credit unions are being challenged by systems that create 'Technology Islands', which really fractures their e-Document Strategy." says Bret Weekes, President and CEO of eDOC Innovations. "CheckLogic allows the credit union to use state-of-the-art, credit union owned solutions, while maintaining their existing account relationship. That is important to any credit union. It also allows the credit union to be more nimble and competitive with clearing costs, since they can now have more clearinghouse relationships."

Integrated into an overall e-Document strategy, CheckLogic allows a credit union to maintain its existing account relationships while providing a state-of-the-art capture solution. The CheckLogic product addresses the federal Check 21 initiative as part of an overall e-document strategy. CheckLogic provides help to credit unions to realize operational savings and process convenience through automation and strategic value in the form of reduced fraud loss and increased institutional strength through the ease of being able to interact with other institutions.

About eDOC Innovations, Inc.
