Madison County Launches New Web Site

Grand Rapids, Michigan – February 9th, 2009

WESCO Net Web Services, a leader in Web Design and Hosting announces the launch of Madison County Federal Credit Union's new web site.

Madison County FCU is using the WESCO Net's SiteControl package, which allows the credit union to easily manage the content of its own site. The design of this site was collaboration between XL Marketing who provided imagery for the site, and the web services team who created the layout. The CUSO also gives credit to Jim Thiemet for offering direction and invaluable member support to ensure the site met expectations of the credit union and its members. WESCO Net Web Services' SiteControl is a state-of-the-art content management solution for web sites. SiteControl is easy to use and yet, extremely flexible and powerful. Clients can get started immediately with the basic features and included themes, then grow into the advanced features and realize the full potential of this tool.

Jim Thiemet, Chief Technology Officer of Madison County FCU testifies: "Our experience with WESCO Net was fantastic. A complete website overhaul is a significant undertaking. The WESCO Net staff addressed our every concern and was very receptive to all requests in a quick and helpful way (thank you James H. for answering my endless questions!). They spent many hours working closely with our design team at XL Marketing (thanks Kim!). They provided solutions to any problem that arose and offered suggestions to issues that we had not even considered. The transition from our former site to our new "jewel" was seamless. The entire process was completely painless.

On the suggestion of WESCO Net, we chose to use the SiteControl package. We love the control it has afforded us over our website. We can now make instant changes to our website anytime we wish! It has allowed us unprecedented control over our web presence. The SiteControl software is very intuitive and easy to learn. With a small time investment even a novice will be amazed at what they can now do on their website. We have been making weekly changes to keep the site fresh. Very helpful for information that you need to push out to your field of membership very quickly.

Overall, I highly recommend WESCO Net's Web Design and Hosting services. If I had to do it all over again, I would not hesitate to do it in exactly the same way."

Madison County Federal Credit Union is a full service Credit Union with 4 branches serving Central Indiana. To access the site and view the "new look and feel", go to <https://www.madcofcu.org/>.
