Digital Docs Network Exceeds 12M Records

Grand Rapids, Michigan – May 6th, 2009

WESCO Net, a Grand Rapids, MI based leader in managed hosting services and manager of the CU*Answers electronic document ASP network, announced in April that the network eclipsed the 12 million online records mark.

"It means over 12 million documents are literally just a few mouse clicks away from our users at the credit unions," says Dave Wordhouse of WESCO Net. "It is significant because it gives an idea of the scalability of the solution. That number is growing every day and at a faster rate as new credit unions are brought online with the network."

To keep pace with demand, WESCO Net recently invested in additional hardware including an expanded storage environment and upgraded application and database servers. "We want to ensure the network's capacity and performance stay ahead of the demand curve in order to deliver a consistently reliable service to our clients," continues Wordhouse.

The digital documents network is provided as a part of CU*Answers' core data processing solution and includes electronic storage of receipts, loan documents, and member IDs such as driver licenses.

About WESCO Net

Organized in 2002, WESCO Net is a full-service network technology solutions provider. They specialize in LAN/WAN design, implementation and management; network security; firewall management; IP telephony VOIP (voice-over-Internet protocol) solutions; records management; managed hosting solutions (facilities management), compliance and security audits (HIPAA/GLBA/SOX); high availability solutions; web site engineering, and hardware sales and support services. WESCO Net provides services to the education, retail, legal, medical, real estate, hospitality, and financial services industries as well as court systems and regional municipalities. Its financial services portfolio includes servicing over 100 credit unions across the country. Visit www.wesconet.com for more information.
