CU*NorthWest Offers Enhanced BSA Tracking

Liberty Lake, WA – August 3rd, 2009

CU*NorthWest, a CUSO known for providing the core data processing system CU*BASE in the Northwest announced it now provides the ability to view the activity of credit union members at shared branching locations locally or nationally for BSA tracking and reporting.

This new software upgrade allows credit unions to view the activity of their members at shared branching locations or national branch locations, which greatly improves a credit union's ability to track transactions for BSA reporting. Transactions occurring across any shared branch network are now aggregated as a part of already existing BSA reporting capabilities native to CU*Base.

CU*NorthWest was one of the first national credit union data processors to offer this level of integration with shared branching networks. CU*NorthWest installed this capability in early June 2009 as a part of the CU*Base 9.0 release.

About CU*NorthWest

CU*NorthWest was founded in 2005 and is a 100% credit union-owned CUSO located in Liberty Lake, Washington. CU*NorthWest offers a wide variety of services for credit unions including its flagship CU*BASE processing system in both an online (ASP) and in-house environment, and Internet development services featuring the **It's Me 247** online banking product. Additional services include web site development, network design and security, bookkeeping services, and a complete eDocument solution. CU*NorthWest provides expertise in implementing technical solutions to operational needs, and helps credit unions form strategic alliances and partnerships.
