Wireless Solution Provides Security for Financial Institutions

Grand Rapids, Michigan – August 3rd, 2009

WESCO Net, a leader in network security consulting services for credit unions based in Grand Rapids, MI announces a wireless solution that meets the security requirements of financial institutions.

WESCO Net offers installation and configuration for SonicWALL's wireless networks. SonicWALL's Clean Wireless solution features: innovative dual protection, integrated high-speed 802.11n technology and high-performance Unified Threat Management, SonicPoint and SonicPoint-N Dual Band, and a Power over Ethernet (PoE) Injector. According to WESCO Net, SonicWALL's wireless solution gives credit union employees the flexibility to work from more locations but with the security that is on par with wired networks. The innovative dual protection delivers both encryption of the wireless traffic and maximum security for the wireless traffic itself through its intrusion prevention and traffic sanitization. The major benefit is SonicWALL's Clean Wireless solution provides secure freedom of location across the branch of credit union employees while enhancing value by offering members wireless hotspots. Overall, it extends the companies' networks without risking their integrity.

"Businesses can feel protected using SonicWALL's wireless solution," says Matt Sawtell, CISSP. "We have the expertise to install and configure wireless networks that meets high security standards – far more secure than traditional Wi-Fi networks."

About WESCO Net

Organized in 2002, WESCO Net is a full-service network technology solutions provider. They specialize in LAN/WAN design, implementation and management; network security; firewall management; IP telephony VOIP (voice-over-Internet protocol) solutions; records management; managed hosting solutions (facilities management), compliance and security audits (HIPAA/GLBA/SOX); high availability solutions; web site engineering, and hardware sales and support services.
