Sentinel FCU Site Gets New Look

Grand Rapids, Michigan – December 23rd, 2009

The Web Services Team at Wesco Net, which caters largely to credit unions utilizing the CU*BASE core processing platform from CU*Answers, has been working hard at developing new websites. One of most recent launched, is a completely redesigned website for Sentinel Federal Credit Union of Box Elder, South Dakota.

The new site for Sentinel Federal FCU is based on the widely popular WordPress with SiteControl platform, which has been awarded the Overall Best Open Source CMS Award in the 2009 Open Source CMS Awards, as well as being named first runner-up in the Best Open Source PHP CMS category. The credit union's newly redesigned site uses hybrid pages, post designs, and utilizes the built in link manager feature to manage the header and footer links.

Sentinel Federal Credit Union has approximately 7,500 members providing a full portfolio of financial services from 4 locations. For more information about Sentinel Federal, go to <http://sentinelfcu.org>

About WESCO Net

Organized in 2002, WESCO Net is a full-service network technology solutions provider. They specialize in LAN/WAN design, implementation and management; network security; firewall management; IP telephony VOIP (voice-over-Internet protocol) solutions; records management; managed hosting solutions (facilities management), compliance and security audits (HIPAA/GLBA/SOX); high availability solutions; web site engineering, and hardware sales and support services. WESCO Net provides services to the education, retail, legal, medical, real estate, hospitality, and financial services industries as well as court systems and regional municipalities. Its financial services portfolio includes servicing over 100 credit unions across the country. Visit www.wesconet.com for more information.
