CU*NorthWest Adds Capacity

Spokane, WA – July 20th, 2010

The data processing CUSO CU*NorthWest, recently announced it has added additional processing capacity at its Liberty Lake, WA data center. With 2 additional iSeries computers, CU*NorthWest is setting the stage for continued growth of its core data processing client base in the coming years. CU*NorthWest will not retire any existing equipment but has simply added these systems for additional development and production processing capacity.

The new systems were readied for implementation during the week of July 5th, 2010. Production processing for CU*NorthWest client credit unions was migrated to a newer, larger and faster iSeries server on Saturday July 10th, with minimal interruption to its network clients.

About CU*NorthWest

CU*NorthWest was founded in 2005 and is a 100% credit union-owned CUSO located in Liberty Lake, Washington. CU*NorthWest offers a wide variety of services for credit unions including its flagship CU*BASE processing system in both an online (ASP) and in-house environment, and Internet development services featuring the **It's Me 247** online banking product. Additional services include web site development, network design and security, bookkeeping services, and a complete eDocument solution. CU*NorthWest provides expertise in implementing technical solutions to operational needs, and helps credit unions form strategic alliances and partnerships.
