## CU\*NorthWest Goes EPOC

**Spokane, WA – July 20<sup>th</sup>, 2010**

The data processing CUSO CU\*NorthWest, announced today it has completed its certification and gone “live” with the first client using FiservEFT’s new online ATM/debit card switch platform, EPOC. The new interface to the EPOC platform was implemented during a recent conversion by 1<sup>st</sup> Valley Credit Union in San Bernardino, CA to CU\*NorthWest’s core processing solution CU\*BASE.

Multiple weeks of certification testing between CU\*NorthWest and Fiserv preceded the implementation with no additional cost passed on to its clients. CU\*NorthWest has numerous credit union clients using FiservEFT under an older version of FiservEFT’s switch software. CU\*NorthWest will complete migrating all of its FiservEFT clients to the new platform by October according to the CUSO.

In addition to meeting the mandatory migration to EPOC as dictated by Fiserv, CU\*NorthWest added additional card maintenance capabilities that are fully integrated to the core processing application, CU\*BASE.

### About CU\*NorthWest

CU\*NorthWest was founded in 2005 and is a 100% credit union-owned CUSO located in Liberty Lake, Washington. CU\*NorthWest offers a wide variety of services for credit unions including its flagship CU\*BASE processing system in both an online (ASP) and in-house environment, and Internet development services featuring the **It's Me 247** online banking product. Additional services include web site development, network design and security, bookkeeping services, and a complete eDocument solution. CU\*NorthWest provides expertise in implementing technical solutions to operational needs, and helps credit unions form strategic alliances and partnerships.
