CU*South Adds Collections Resource

Mobile, AL – September 16th, 2010

GDS/CU*South, a regional provider of core data processing for credit unions, has recently announced the addition of a new resource for its Managed Services team. Ashley Beard has joined the team as a Collections Specialist to provide credit union clients assistance with their loan delinquencies.

According to the CUSO, Ms. Beard has earned a Bachelor of Arts Degree in Education Technology from Jackson State University, and has a comprehensive professional background with heavy focus in customer service, computer support, and academic affairs.

CU*South concluded that they are excited to take advantage of her skills, and welcome her to the team.

About CU*South

CU*South is a credit union-owned cooperative focused on building a network of successful credit unions. CU*South offers a wide variety of services including its flagship CU*BASE processing system offered in both online (ASP) and in-house processing environments, and Internet development services featuring **It's Me 247** online banking product, and **It's Me 247** Mobile Web Banking – new for 2010, and free for CU*BASE clients. As a partner of the cuasterisk.com network, CU*South provides the most comprehensive offering of information technology tools and services through a collaborative, shared ownership model, with the same great value credit unions offer members.
